## Working Together

### With the Community

We have developed a unique program to help our community become cleaner and greener.

### Together we CAN:

**Reduce** the amount of waste by preventing it in the first place. Preventing waste can help you save and reduce your negative impact on the environment.

**Reuse** items and assets by giving them a second chance. Instead of throwing away your used and unwanted assets, donate them and give them a new life. Donating is a guarantee that your items will end up back in the "Lifecycle" of used electronics. Remember, what you see as useless, someone else sees as useful.

**Recycle** your e-waste properly. Consumer electronics such as TVs, computer equipment, and DVD players contain toxic metals and chemicals. According to the EPA, Americans own nearly 3 billion electronic products.

**Provide jobs** by donating to T.O.U.C.H. All proceeds go towards funding T.O.U.C.H. job programs for seniors and other hard-to-employ individuals.

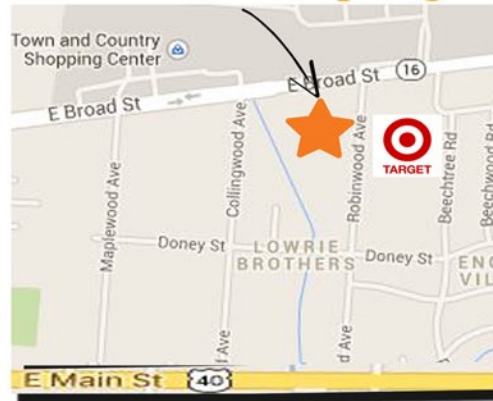

## DROP OFF LOCATION

# TOUCH.

**37 Robinwood Ave.  
Whitehall, OH 43213  
614-338-8733**

[www.touchimp.org](http://www.touchimp.org)

TEACHING OPPORTUNITY UNITY BY CONNECTING HEARTS

## GOES "GREEN"

with

Touch is a mentoring program for previously incarcerated individuals. Through eREP, we strive to improve our community by providing jobs, while also improving & sustaining the environment.

## Help the community by Recycling

## Donate Your Recyclable Assets For A Good Cause

TEACHING OPPORTUNITY UNITY BY CONNECTING HEARTS

### Mission Statement:

T.O.U.C.H. (Teaching Opportunity Unity by Connecting Hearts) serves at-risk and vulnerable populations in Central Ohio. Our mission is to “reach out and touch” the lives of individuals and families, empowering them to achieve self-sufficiency, positive relationships, and economic success. We help to restore communities by restoring lives.

### “Breaking the Chains, Breaking the Cycle”

### Program Purpose:

To carve a path for the participant’s honest attempts toward:

1. Productive community reintegration as a law abiding citizen.
2. Obtaining and holding employment.
3. Learning and exercising proper money management.
4. Pursuing all which enables the participant to remain crime-free, as well as to enjoy and sustain a life of freedom, responsibility, dependability and success.
5. Pursuing personal and family stability.

### T.O.U.C.H. Mentoring:

What makes T.O.U.C.H. unique is the mentoring component applied throughout the program. Mentors are involved at all levels of program/service delivery, including but not limited to, group facilitation, one-on-one sessions, and teaching the Computer Literacy classes.

### Schedule Your Recycling Drop-off Day

You can help! Schedule an electronics drop-off day at your business/organization and we will pick up the items.

If interested, please call 614-338-8733.

## THINK GREEN

### Donate Your Recyclable Assets For A Good Cause

#### Provide Jobs

- Improve & Sustain the Environment
- Promote Economic Growth & Development
- Improve Public Safety
- Build Confidence & Self Esteem
- Keep Our Neighborhood Clean
- Reduce Landfill Pollution

- |                     |                         |
|---------------------|-------------------------|
| Electronics         | Medical Equipment       |
| Computer            | Restaurant Equipment    |
| Appliances          | Networking Equipment    |
| Machinery           | Presentation Equipment  |
| IT gear/accessories | Office Equipment., etc. |

If you have something you’d like to donate, but aren’t sure if we accept it. Please call.

**Donation Receipts Will Be Provided**  
**Conditional Pick-ups Available**

TEACHING OPPORTUNITY UNITY BY CONNECTING HEARTS

We are actively involved in protecting the environment through a number of programs designed to maximize both reusing and recycling.

### Services:

If you have surplus or obsolete equipment you’re in luck! We can remarket newer and older equipment. If it has no value then we provide disposal and recycling service. We can offer a consignment program. This is a great idea for companies who may possess an excess electronics inventory.

### Our Promise:

T.O.U.C.H. maintains the policy that no equipment we process will end up in a landfill. All assets will go back into the production stream as raw materials, through the use of refineries and processing plants. This process closes the end-of-life-loop.

### Facts on Recycling:

The average lifespan for a common PC is estimated to be three to five years. Every year, 20 to 50 million metric tons of e-waste is generated worldwide. Electronics are the fastest growing portion of America’s trash. More than 3.2 million tons of electronic waste is dumped in U.S. landfills each year.
